

# MAMMA MIA

*Mamma Mia!* is a stage musical written by British playwright Catherine Johnson, based on the songs by ABBA.

Although the title of the musical is taken from the group's 1975 chart-topper "Mamma Mia" the plot is fictional. In a Greek island a girl is arranging her wedding with the help of her mother. She will have to find out by herself who her father is when the guests arrive.

The musical also includes hits as "Dancing Queen", "Thank you for the music" and "SOS". Over 42 million people have now seen the show in Broadway, London and many other countries. A film adaptation, *Mamma Mia! The Movie*, was released in July 2008.
